

What's Your Score

Do you know how at risk you are of an OD?

We have a new short quick test that can help you measure how risky the way you use is, and it only takes **2** minutes.

How risky is everyone else?

We're keeping an average score for the area, that way you'll get to see how the way you use compares to the risks other people take. Can you get your risk level below the average?

Make this town the lowest risk OD town in the area!

This tool is also being used in other areas nearby, can we show them we are taking less risks than they are?

Find out more

To find out the current average risk of this or other areas, or if you'd like to take the risk test, just ask a member of staff.
